Personal use only. Do not redistribute.

The GEO Citation Prompt Pack: Get Cited in ChatGPT, Perplexity & AI Overviews (2026 Edition)

Product subtitle

The 40-prompt + 10-checklist system that makes your brand the answer AI engines cite - built for ChatGPT, Perplexity, Google AI Overviews, and Gemini, around Writesonic, Surfer, and Copy.ai.

Description (sales copy)

Someone just asked ChatGPT to recommend a tool like yours - and your competitors got named. You were not in the answer. AI answers leave no referral trail in your analytics, so you cannot even see what you are losing.

The GEO Citation Prompt Pack is the exact system AI ToolKit uses to earn citations in 2026. Inside you get 40 ready-to-copy prompts and 10 production checklists covering the five jobs that actually move citation share:

Citation audit - find out which questions name your competitors and whether you appear at all, in every major engine.

Extractable structure - rewrite your key pages so AI engines can lift clean answers: definition-first openings, dated FAQs, schema, crawlability.

Fact density - add the statistics, named sources, and original numbers the Princeton GEO research showed can lift visibility of lower-ranked sites by up to 40%.

Weekly citable assets - ship one fact-dense explainer, comparison, or stat page per week with a repeatable workflow.

Tracking and tool selection - choose the right stack (Copy.ai at \$24/mo, Writesonic Starter at \$79/mo, Surfer Standard at \$99/mo) and automate monitoring only when manual checks stop being enough.

Every prompt is built for the tools tested in our companion guide, Best GEO & AI Search Visibility Tools in 2026: Writesonic, Surfer, and Copy.ai. Drop each prompt into the tool, fill in the bracketed fields, and publish.

The data behind this pack:

- Only 11% of cited domains overlap between ChatGPT and Perplexity (Siftly research) - you must structure for each engine, not one.
- ChatGPT cited pages ranking in traditional positions 21+ almost 90% of the time (Semrush) - you do not need to win Google first.
- Adding "2026" to titles produced a 61% increase in AI citations (Otterly.ai) - freshness signals are cheap and measurable.
- "Fact density" boosted visibility of lower-ranked sites by up to 40% in AI responses (Princeton GEO study).

No 22,000-searches-per-month hype. No enterprise quote maze. Just a repeatable weekly workflow that starts free.

What you get:

- 40 copy-paste AI prompts (PDF + Markdown)

- 10 production checklists
- The 90-minute weekly GEO workflow
- Tool-stack map with free-vs-paid picks
- Platform mechanics cheat sheet (what ChatGPT, Perplexity, and AI Overviews each reward)

Price: \$17

The GEO Citation Prompt Pack

40 Prompts + 10 Checklists for Audit, Structure, Fact Density, Content, and Tracking

For: Small businesses, content teams, agencies, and solo operators who want their brand named in AI answers

How to use this pack

Pick the section matching this week's bottleneck.

Copy the prompt into your tool (Writesonic for tracking + content, Surfer for optimized content, Copy.ai for budget content production).

Fill in every [BRACKETED] field before running - generic inputs produce generic content.

Route any statistics or claims through a source check before publishing - fact density only works if the facts are real.

LOG -

The 10 production checklists

Checklist 1 - Monday baseline check (15 min, weekly)

- ☐ Paste each of my 5 tracking prompts into ChatGPT
- ☐ Same 5 into Perplexity (live search - most generous citer)
- ☐ Same 5 into Gemini
- ☐ Log: brand named Y/N, position, sentiment, competitors named
- ☐ Note any new citation and which page earned it
- ☐ Update the citation log spreadsheet

Checklist 2 - Page extractability pass (per page, 30 min)

- ☐ First sentence under H1 is a direct definition under 40 words
- ☐ 50-70 word self-contained answer block near the top
- ☐ No marketing adjectives in the first paragraph
- ☐ Brand name appears in the extractable passage
- ☐ One hard number in the extractable passage

Checklist 3 - Dated FAQ build (per page, 20 min)

- ☐ 6 questions phrased as buyers actually type them
- ☐ Every answer under 60 words
- ☐ At least 3 answers contain a statistic or named source
- ☐ "Last updated: [MONTH YEAR]" visible on the page
- ☐ FAQPage schema added

Checklist 4 - Fact density (per asset, 20 min)

- ☐ At least one statistic per 150 words (money pages) / 300 words (support pages)
- ☐ Every statistic has a named source inline
- ☐ One expert quote with attribution
- ☐ One original statistic from my own data where possible
- ☐ Zero invented numbers - every [SOURCE NEEDED] tag resolved

Checklist 5 - Crawlability pre-flight (monthly + after site changes)

- ☐ robots.txt does not block GPTBot, ChatGPT-User, PerplexityBot, or Google-Extended
- ☐ Key pages not behind paywall, login, or JS-only rendering
- ☐ Sitemap submitted and current
- ☐ Schema validates (Rich Results Test / validator.schema.org)
- ☐ Canonical tags correct on refreshed pages

Checklist 6 - Freshness signals (per asset)

- ☐ "2026" in title where natural
- ☐ Visible "Last updated" date under the H1
- ☐ All visible dates current
- ☐ Statistics older than 12 months replaced or re-sourced
- ☐ One new section noting what changed in the last year

Checklist 7 - Per-engine structure (per asset)

- ☐ Perplexity: sections phrased as buyer-question H2s, sources line included
- ☐ AI Overviews: direct answer paragraph within 60 words of H1
- ☐ ChatGPT/Gemini (training data): definition passage consistent with About page and third-party descriptions
- ☐ Page opens correctly when fetched without JS

Checklist 8 - Weekly citable asset ship (90 min, weekly)

- ☐ Asset picked from 12-week calendar
- ☐ Drafted with prompts P31-P34, facts verified
- ☐ Structure pass done (Checklist 2 + 3)
- ☐ Published, sitemap updated, Search Console indexing requested
- ☐ One live Perplexity check for the asset's target question
- ☐ Logged in citation log

Checklist 9 - Tool tier decision (monthly, 10 min)

- [] Citation share computed for the month
- [] Rule applied: rising share -> stay manual + Copy.ai (\$24/mo billed annually)
- [] Flat or falling 30+ days -> trial Writesonic Starter (\$79/mo billed annually) or Surfer Standard (\$99/mo billed yearly)
- [] Existing Surfer team needing multi-engine -> compare Surfer Pro (\$182/mo billed yearly) vs Writesonic Growth
- [] Agency/enterprise share-of-voice defense -> shortlist Profound, Otterly.ai, Peec AI
- [] Decision + date logged

Checklist 10 - Quarterly review (45 min, quarterly)

- [] Citation share trend by engine
- [] Correlate published assets with citation events
- [] Formats ranked by citation yield
- [] Fact density vs freshness: which moved share more
- [] Next quarter's calendar drafted from the winners
- [] Tier decision re-confirmed or escalated
